Art Unit: 1762

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-30, drawn to a process for treating exhaust gas from plasma processing of substrate or film (CVD or etching), classified in class 427 or 216, subclass 569+ or 67+, respectively.
  - II. Claims 30-50, drawn to an apparatus for treating exhaust gas from a plasma process, classified in class 118, subclass 723R+.
- 2. The inventions are distinct, each from the other because:

Inventions group I and group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). In this case the apparatus may be used for treating plasma gas that has been used for other than substrate or film processing, as those objects are not part of the apparatus and their treatment is a method limitation that does not limit the structure of the apparatus claims as written. Exemplary alternate processes may include plasma processing of a gas to change its chemistry or to produce a powder.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/822,191

Art Unit: 1762

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I , restriction for examination purposes as indicated is proper.

4. A telephone call was made to Peter Saxon on 3/19/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Mailing of the restriction was requested.

- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. L. Padgett whose telephone number is (571) 272-1425. The examiner can normally be reached on M-F from about 8:30a.m to 4:30p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Beck Shrive, can be reached on (571) 272-1415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306 for all official papers.
